EDUCATION

University of Washington, Seattle, USA – M.S. in Data Science – **GPA: 3.9/4** (Sep 2025 – Expected Jun 2027)

Relevant Coursework: Machine Learning, Deep Learning, NLP, Statistical Modeling, Data Visualization, Data Mining, Big Data

GGSIIP University, India – B.Tech in Computer Science & Engineering – **GPA: 3.8/4** (Dec 2020 – Jun 2024)

SKILLS

Programming – Python, R, SQL, Jupyter, Java, JavaScript, TypeScript, MongoDB

Data Analysis & ML – Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, Hypothesis Testing, Regression, A/B Testing

Visualization & Tools – Matplotlib, Seaborn, Excel, Tableau, Power BI, Git/GitHub

Big Data & Cloud – Apache Spark (PySpark), Hadoop (HDFS, MapReduce), Databricks, AWS

EXPERIENCE

IT (Data Driven) Intern – Bajaj Capitals, Gurugram, India (Dec 2024 – Jun 2025)

- Designed financial analysis tools processing **10K+ customer profiles**, generating actionable retirement insights.
- Built and maintained scalable components using Python and JavaScript, collaborating closely with cross-functional teams.
- Developed **interactive dashboards in Power BI and Tableau** for investment trend visualization, improving management decision speed by **20%**.
- Conducted **statistical portfolio analysis** (Python & SQL), improving risk detection across 2K+ client portfolios.

Data Science Intern – Truminds Software Systems, Gurugram, India (Mar 2024 – Jul 2024)

- Optimized large-scale ETL pipelines using **Apache Spark (PySpark)** and **Hadoop**, reducing processing time by 20%.
- Integrated **Google Maps API** for geospatial analytics, enriching location data for **5K+ records**.
- Designed **SQL queries & Python scripts** for data cleaning and wrangling, improving pipeline reliability by **30%**.

SDE Intern – ITMTB Technologies, Pune, India (Aug 2022 – Sep 2022)

- Engineered a **healthcare analytics platform** with **role-based auth** and an **AWS-hosted backend**.
- Implemented **predictive analytics on 50K+ patient records**, improving diagnostic accuracy by **15%**.
- Optimized backend queries and APIs, reducing system latency by **25%** and applied best practices for code documentation.

PROJECTS

Deepfake Detection System (Python, PyTorch, CNN, OpenCV, Streamlit)

- Designed an end-to-end image and video classification pipeline to detect deepfake content using deep learning models.
- Processed and analyzed 10K+ images and videos, performing frame extraction, normalization, and feature engineering.
- Achieved 90% validation accuracy and trained CNN-based models, focusing on overfitting control and error analysis.

MindTunes - Neural Activity Dashboard (Python, PyTorch, MNE, React, Three.js)

- Built a GPU-accelerated 3D brain model with real-time activation of 68 regions at 30 FPS, reducing render latency by 40%.
- Developed an EEG waveform engine (from OpenNeuro) processing 1,000+ samples/sec with LLM-based insight generation.

Customer Churn Prediction (Python, SQL, Jupyter, Scikit-learn)

- Analyzed 5M+ telecom customer records to identify churn patterns using logistic regression.
- Achieved 89% prediction accuracy and automated SQL-based data pipeline for daily retraining.

LEADERSHIP & ACHIEVEMENTS

- **2nd Place, Databricks x UW MSDS Hackathon (Nov 2025)** – Developed an ML solution to predict the risk of missed flight connections using the **Databricks** workflow.
- **Microsoft Learn Student Ambassador (Beta)** – Conducted Git/GitHub workshops for 60+ attendees.
- **Vice President (Enactus ADGITM)** – Directed & empowered a 40+ member team to deliver community-driven projects.
